Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Drawings

1. The drawings are objected to because
 - a. the element letters (HB) are not shown in the drawings.
 - b. The hoist should be labeled and numbered.

Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Art Unit: 3723

2. Claims 1-5 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

c. The hoist because it is shown in the drawings but there is not a description of the base, wheels, actuator, and support arm. The hoist should be recited in both the claims and specification with this minimum structure as shown by the applicant drawings.

3. Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

d. The following phrases are lack proper antecedent basis:

i. "The method" in claim 1, line 1. This should recite - - A - - instead of "The".

ii. "the hoist" in claim 1, line 6. This has not been previously mentioned.

iii. The dependent claims 3-5 should recite - - The - - at the beginning of the preamble.

e. The following phrases are vague, indefinite, confusingly, and awkwardly worded.

- iv. "the hoist" in claim 1, line 6 and "a hoist apparatus" in claim 2, line 6. The hoist should recite some minimum structure such as a base a support and an actuator.
- v. "its" in claim 1, line 14 and claim 2, line 8. The limitation should be positively recited.
- vi. "any" in claim 1, line 16. This is not going to be true of all obstructions.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 2-3 are rejected under 35 U.S.C. 102(b) as being anticipated by McIntire et al (4479632).

McIntire et al disclose an apparatus having a hoist (figs. 1-3), an engine plate (80), an engine adapter plate (58), a lift adapter arm (52), a lever controller (88) with a shaft (104), hinge pin (element 82 shows a pin and hex bolt which is removal).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 3723

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over by McIntire et al (4479632) in view of Hawkins et al (6276665).

- f. McIntire et al are discussed above.
- g. McIntire et al do not disclose a telescoping arm.
- h. Hawkins et al disclose an apparatus having a telescoping arm which allows more arm control.
- i. It would be obvious at the time the invention was made to have modified the McIntire et al device by replacing the arms with telescoping arms as taught by Hawkins et al which allows more arm control.

Allowable Subject Matter

8. Claims 1 and 5 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

9. The following is a statement of reasons for the indication of allowable subject matter: the adjusting lever control ratchet in combination with the other limitations is not shown nor suggested by the prior art.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Baker, Napier et al , and Hong disclose an invention.
